Every image from every row is an exact reflection straight from this student's device!

Dig deep into the core of how your students spend their time online.

CONNECTING TEACHERS TO THEIR STUDENTS

Teachers understand the need to interact with their students to encourage responsible internet use and parents understand their involvement is best for their children.

With Visible Internet Student Platform, teachers can stay tuned to their students' online activities via their own computer workstations or smartphones and tablets.

Teachers can identify specific points in their lesson when their students "go off" topic empowering teachers to fine tune learning content to achieve the better learning outcomes.

CLASS 1A (12)

- Adams, Lucy (iPad)
- Bridge, John (MacBook)
- Brown, Michelle (Windows)
